

## 867/1 BDC TORX® bits

**Application:** TORX® socket screws

**Drive:** 1/4" hexagon, suitable for DIN ISO 1173-D 6,3 bit holders

**Design:** BiTorsion for long service life, diamond-coated for secure screw fit. Take it easy toolfinder: Output colour coding (green = TORX®) and large stamp to enable the desired bit to be easily located.

## Tip

### Impaktor-Bits

Impact-Bits are needed when a strong power tool (e.g. 18 volt impact screwdriver) is used. Impact bits were specifically developed to withstand high power tool forces.

### BDC-Bits

BDC-Bits are absolutely premium products. They have a softer BiTorsion zone which reduces the hardness of the shaft by about 20 % in comparison to the drive tip. This means that the peak loads that cause bit breakage and premature wear are absorbed in this zone – something which enhances the service life of the bits. The diamond coating lowers the danger of slipping as the minute diamond particles literally "bite" themselves into the screw head. B stands for BiTorsion. DC stands for diamond coated.

### "Take it easy"

"Take it easy" tool finder with colour coding according to profiles and size stamp – for simple and rapid accessing of the required tool.
