PRESS

The Kraftform Turbo accelerates the screwdriving – in a purely mechanical way.

Faster screwdriving

The construction of the Kraftform Turbo allows a quadruplication of the speed when manually screwdriving - purely mechanical, without electricity!

With and without Turbo

If required, the turbo function can be activated by simply pressing a button. Turning it off is recommended for loosening or for fine adjustment and final tightening of the screw with a high torque.

Robust, maintenance-free gear made of steel

The robust steel design is maintenance-free and ensures a long product life.

Handle/interchangeable blade system

Thanks to the Rapidaptor bit holder, the Kraftform Turbo can be used with all conventional 1/4" bits.

Many users would like to be able to carry out screwdriving processes faster without compromise. With a screwdriver that is precise, allows powerful screwdriving, and is much faster than a conventional screwdriver.

A part time universal gear is the solution: integrated in the handle of the screwdriver, it significantly increases the working speed.

The Kraftform Turbo accelerates the screwdriving in a purely mechanical way.

826 T Kraftform Turbo bits handholder with Rapidaptor quick-release chuck

Application: Suitable for bits with 1/4"-external hexagon drive as per DIN ISO 1173-C 6,3 and E 6,3 and Wera connection series 1 and 4

Design: Connectable mechanic turbo function for quadrupling the screwdriving speed; robust, maintenance-free gear made of steel; 1/4"-hexagon socket mounting with Rapidaptor technology with rapid-in, rapid-out, rapid-spin, chuck-all and single-hand functions, magnetic

Handle: Kraftform with anti-roll protection, multi-component
