Impact drivers

It has to be possible that even the most seized screw can be loosened. Impact drivers are the solution whenever manual power is insufficient and a pneumatic screwdriver is not to hand. The Wera impact driver has particularly high efficiency thanks to its robust double-curved design. Impact forces are converted into rotary motion and so there is no need for the use of pneumatic appliances.

No need for power tools

Seized screws can be loosened or tightened without power tools.

Highly efficient

The double-curved design is particularly efficient.
